

M. NARENDRA, M.Sc. B.Ed., Member of Breakthrough Science Society ~~attends~~ presented a Guest Lecture on: Role of Science in Human Development.

SYNOPSIS:

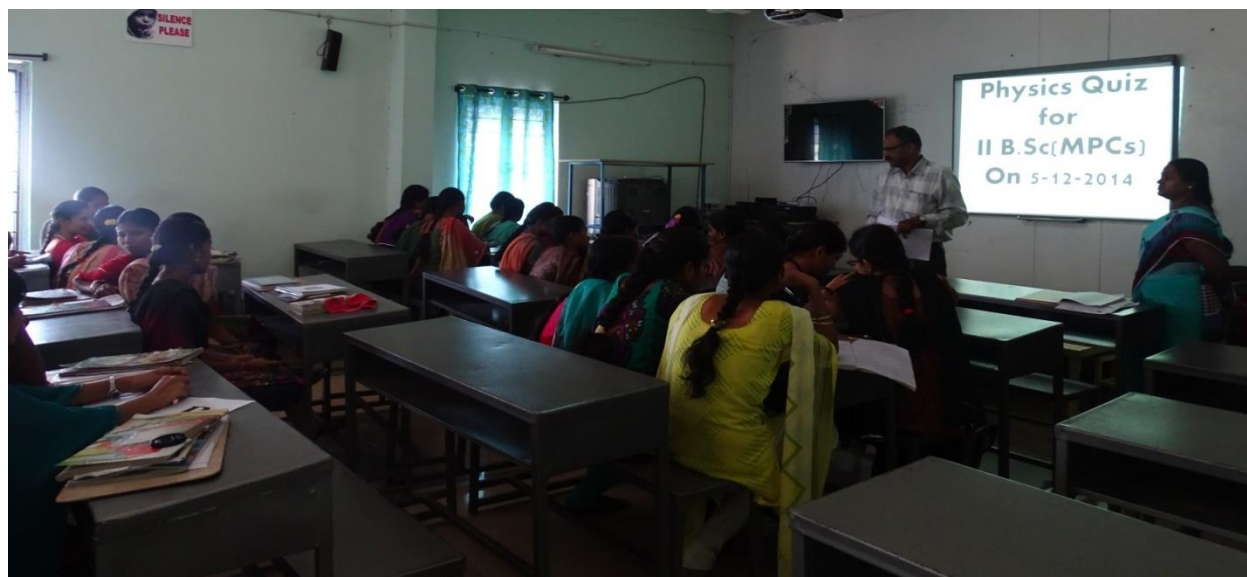

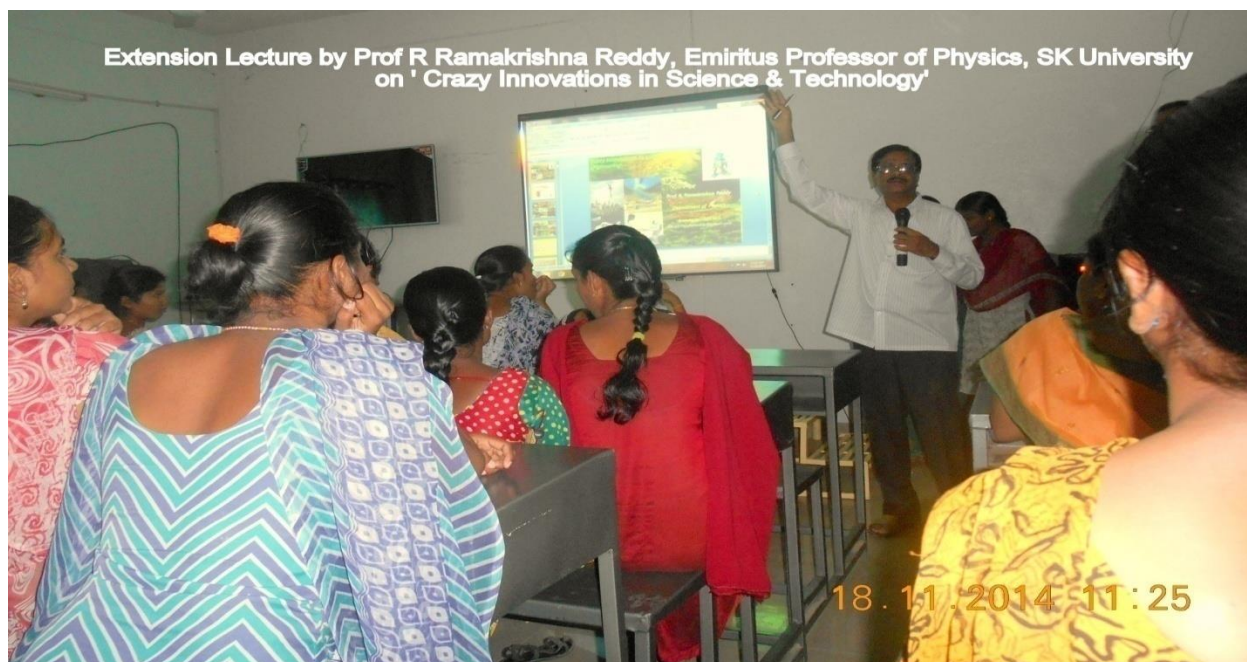

Role of Science in Human Development.

Science plays a vital role in day to day life of human beings. Science is rapidly changing the everyday life of man. For example, a mobile phone which was a luxury 30 yrs back is now a compulsory accessory. Science can even help us to study about its microscopic level such as 10^{-9} mts dimension and it is also helping a lot to know about the universe whose dimensions are greater than 10^{19} mts.

It is the science which is responsible in knowing about the Mars which is a distant planet from the Earth. The landing of MOM on the Mars is also because of study of Science.

**Extension Lecture by Prof. R. Ramakrishna Reddy, Emiritus
Professor of Physics, SK Univerity on Crazy Innovations in Science
and Technology on 18-11-2014**

USING POWER POINT PRESENTATION in MANA TV ROOM

KSN GOVERNMENT DEGREE COLLEGE FOR WOMEN, ANANTHAPURAMU
DEPARTMENT OF PHYSICS
ICT USED

A Guest Lecture has been organized on **19/8/2016** for the III B.Sc (MPCs) students on by Shama Bharathi Lecturer in English Kalyanadurg

KSN GOVERNMENT DEGREE COLLEGE FOR WOMEN, ANANTHAPURAMU
DEPARTMENT OF PHYSICS
ICT USED

INAUGURATION OF VIRTUAL CLASS ROOM IN ROOM NO. 23 BY Dr.Y. Munikrishna Reddy,
Associate Professor of Physics, SSBN Degree College, Ananthapuramu.

**“BIOSENSORS” on 18-09-2017 presentation of Extension
lecture on Biosensors**
